

## 9C2 (9002) Transducer

The 9C2<sup>1</sup> is a multifrequency, broad bandwidth transducer. Wide scanning angle and penetration depth makes it the ideal choice for general abdominal and obstetric examinations.

- Broad bandwidth gives excellent image quality
- Activate the transducer and freeze, store and print images with one press of the integrated Smart™ button
- Ergonomic design improves operator comfort
- Advanced transducer connector is designed for noise reduction in the ultrasound image and one-handed operation
- Perform quick, reliable puncture and biopsy procedures with our reusable needle guide
- Unique, fully-immersible transducer for easy sterilization
